

The background of the image shows the Indian national flag, the Tiranga, with its saffron, white, and green horizontal stripes and the Ashoka Chakra in the center. The flag is flying on a tall pole on the left side of the frame. Behind the flag, a dense urban landscape is visible, but it is heavily obscured by a thick layer of smog or haze, giving the city a grey, monochromatic appearance. This visual contrast serves as a backdrop for the title text.

INDIA v/s POLLUTION

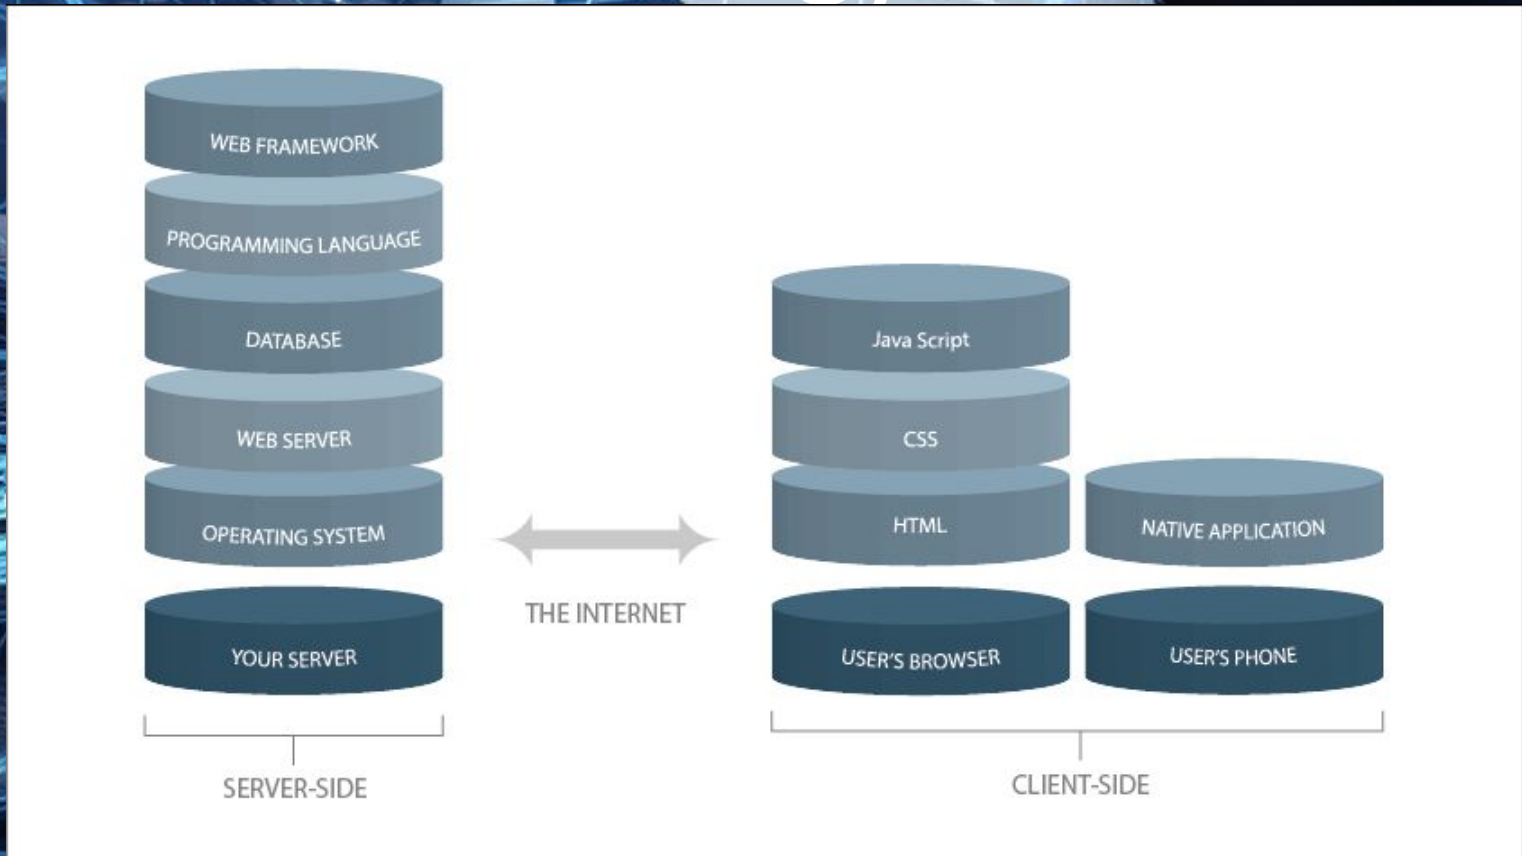

INDIA v/s POLLUTION

- Ministry:
- Problem Statement:
 - This project aims to bring the user identified Sources of pollution in a locality to the notice of the concerned higher authority via the medium of social media.
 - An automated system which email /tweet the concerned authority when a complaint will get more votes than a specified number.
 - Thus it provides an End- 2-End tool to battle pollution democratically by partnering with the government.
- Problem Code:
- Team Leader Name: Atharva Tendulkar
- College Code:

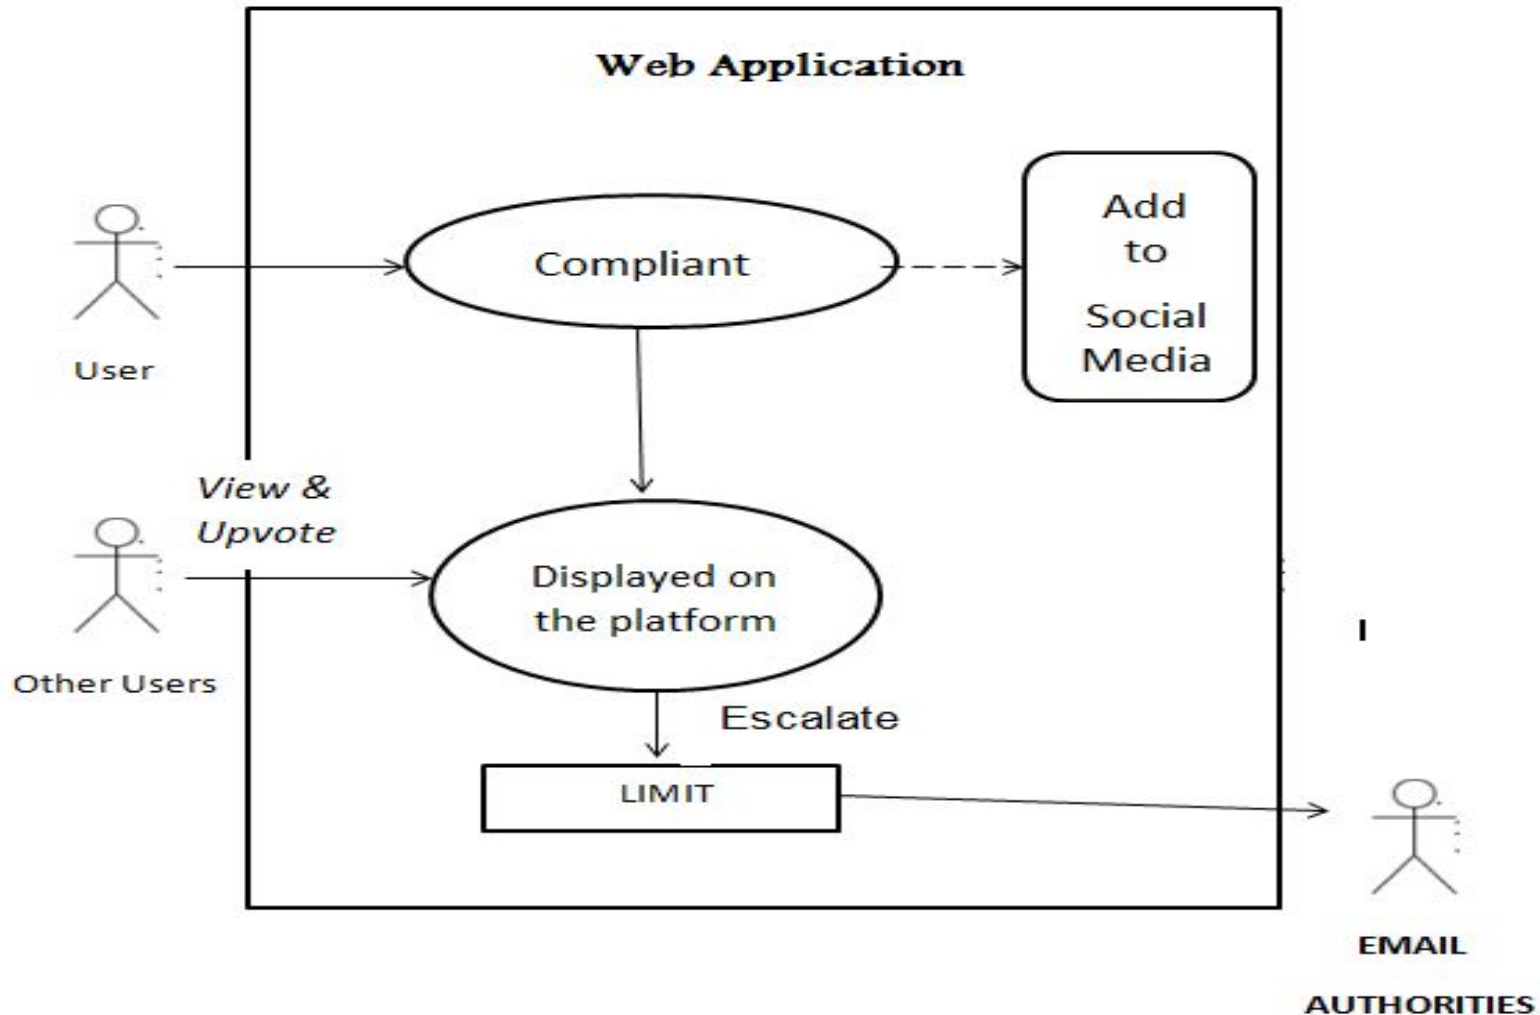

Idea/Solution

- This project aims to bring the user identified Sources of pollution in a locality to the notice of the concerned higher authority via the medium of social media.
- An automated system which email /tweet the concerned authority when a complaint will get more votes than a specified number.
- Thus it provides an End- 2-End tool to battle pollution democratically by partnering with the government.
